

Postnatal Nutrition

Eating a variety of healthy foods from the 5 food groups can:

- Speed up your recovery
- Boost your energy
- Support your wellbeing

Avoid eating foods high in saturated fat, added sugar and salt to support your energy levels.

WHAT TO EAT WHEN BREASTFEEDING?

When breastfeeding, your body needs more energy. This is equivalent to an extra tuna and salad wholemeal sandwich, tub of yoghurt and piece of fruit per day.

Aim to eat extra fibre-rich foods, such as wholegrains, legumes, fruit and vegetables.

Your requirements also increase for key nutrients to support your baby's brain development, nervous system and build healthy red blood cells.

IODINE

Fish*, seafood, seaweed, iodised salt, and iodised bread.

CHOLINE

Eggs, meat, chicken, dairy, tofu and soybeans.

OMEGA 3 FATS*

Salmon, tuna, canned tuna in oil, sardines, anchovies, octopus, nuts and seeds.

VITAMIN B12

Dairy products, red meats, poultry, seafood*, eggs and fortified milk. If you follow a vegan diet, speak with your doctor about supplementation.

* AIM TO EAT 150G OF FISH LOW IN MERCURY 2-3 TIMES PER WEEK, INCLUDING MACKEREL, CANNED SALMON OR TUNA IN OIL, SNAPPER, BREAM.
(NSW Government Food Authority)

DRINKS WHEN BREASTFEEDING

- Aim to drink 9 cups of water per day to stay hydrated.
- Try to limit your caffeine intake to 1 espresso OR 4 cups of tea OR 1 energy drink per day.
- Avoid alcohol as it passes into your breast milk.

QUICK AND EASY MEAL IDEAS:
