FAMILY PARTNERSHIP MODEL MASTERCLASS ADVANCING PRACTICE

How to manage when you get 'stuck' when working with others

There are times in most clinicians' work life where a relationship which was once working well becomes stuck. This 2-hour workshop, aims to support the advancement of FPM practice for any clinical staff who have completed the 5 day Family Partnership Foundation Training and are looking to build on their current skills to effectively use FPM in practice.

This 2-hour workshop will be facilitated using FPM principles including reflective discussion, skills practice and information sharing. The focus of the two hours will be on identifying the common reasons for becoming stuck and exploring together how to become unstuck and remain in an effective partnership with the family and colleagues to achieve mutually beneficial outcomes for all.
